

01 [0001] This application claims the benefit of United States Provisional Patent Application No. 60/191,359, filed March 22, 2000; United States Provisional Patent Application No. 60/191,205, filed March 22, 2000; United States Provisional Patent Application No. 60/245,503, filed November 3, 2000; United States Provisional Patent Application No. 60/245,826, filed November 3, 2000; and United States Provisional Patent Application No. 60/259,563, filed January 2, 2001.

REMARKS

Applicants have amended the section entitled "Cross Reference to Related Applications" to include priority document information issued by the U.S. Patent and Trademark Office after this application was filed. This application, filed March 22, 2001, claims priority from United States Provisional Patent Application No. 60/259,563, filed January 2, 2001. (A claim for priority was made in an executed Declaration by the inventors filed December 21, 2001 (copy enclosed)). Applicants did not receive an application number for the aforementioned priority document until the Patent and Trademark Office issued a May 16, 2001 Replacement Filing Receipt (copy enclosed).

Paragraph [0001] of the application referred to the priority document as "[P.A. Burton] United States provisional patent application entitled SYSTEMS AND METHODS FOR USING CODES TO IDENTIFY OR GROUP ORDERS, filed January 2, 2001, Attorney Docket No. ATG-6 PROV2." Applicants have replaced the inventor's name and the application title in paragraph [0001] with the application number assigned to the priority document by the Patent and Trademark Office. A copy of a Corrected Filing Receipt issued March 1, 2002 in connection with the priority document showing the correspondence between the priority document Attorney Docket Number and application number is enclosed. This Amendment is shown in the attached Appendix. No new matter is added by this Amendment.
